

## JETSTORM FIXED HEAD

Go green in style ...

### DESIGN

The compact Jetstorm Fixed Head showerhead features Ecocamel's fantastic Aircore Technology that delivers an invigorating shower for an exhilarating, full flow, spa-like experience.

### AIRCORE TECHNOLOGY

Aircore Technology draws air in through an air intake and mixes it with the water flow. This creates turbulence that increases the water pressure coming out of the showerhead. You get the same powerful shower as a full flow shower, but you use up to 45% less water.

The Ecocamel shower heads gives a complete full flow spa-like shower by using the latest water and energy saving technology.

Our ground breaking range of shower heads incorporate our revolutionary Aircore technology to inject air directly into the water stream to use less water but still experience a powerful shower.

## JETSTORM FIXED HEAD

### DIMENSIONS

Height:	87.5mm
Width:	104mm
Weight:	240grams
No of nozzles:	36

Width

Height
